The front wheels of the flail mower are puncture-proof.

The shredder is supplied as standard with grass blades. The grass blades throw the cut into the auger which is carried on the loading turbine and then inside the basket.

The scarifier blade kit is optional and allows you to transform the shredder into a professional scarifier.

Thanks to the possibility of mounting the blades of the scarifier kit together with the grass blades, it is possible to perform cutting, scarifying and collecting operations at the same time.
