

BREVIGLIERI B83 ROTARY HOE

Soil cultivation is essential to the success of all other crop operations. It has a direct impact on the conservation of the soil, as well as its level of fertility and productivity. Italian-made Breviglieri machines are the popular choice for farmers and contractors converting previous uncultivated ground into a highly productive seed bed or growing environment. The B83 Series covers working widths from 1.59 metres through to 2.31 metres for 50 – 90 hp tractors.
