- Fully welded geared to give greater rigidity and ensure gears stay “true at all times”
- 15 degree rotor time to reduce horsepower demand and fuel consumption, producing a finer seedbed
- Boron steel tines
- Forged and heat treated one piece rotor shafts
- Greasable top bearings to ensure they have adequate lubrication
- 45 degree moving side plates to ensure flat finish for seedbed preparation
- Hardened gears for long life
- Two speed gearbox
- Oil cooler on gearbox
- Tine locking counter plates
- Rear levelling bar with winder height control and indicator
- Hydraulic depth control
- Cam clutch
