

## CELLI SPIKE ROTOR (FOLDING) - TIGER 280

### TRACTORS FROM 180 - 280 HP

The Tiger 280P is an HC (High Clearance) machine, which means that it provides a large space between the blades and the bottom of the rotary tiller frame. This guarantees very limited clogging even in difficult conditions (sticky soil, abundant crop residue). Thanks to this particular configuration, power absorption always remains within reasonable limits, allowing an economically advantageous use of the equipment.

1) The central frame is one of the critical points of all folding machines. Celli has created a central structure that is unmatched on the market.
