PRODUCT DESCRIPTION

This cutter bar is ideal for cutting all grass types and can be used in rustic areas, fruit orchards and grass for animal feed. The oil bath action is built using premium steel types and the cutting device is adjustable. The floating grass disperser is mounted on anti-vibration rubbers with a special profile to dispel the grass in the most demanding conditions; the grass is cut, dropped to the ground by the action of the wheels allowing easier control when moving forwards.

The blade sections are made of special steel and fixed with special 6 mm length rivets.. The cutter bar's teeth are made of a special profile to ensure a perfect cut and are made of special heat treated steel. The blade tensioners are adjustable ensuring so a constant fit between blade and teeth.
