## PRODUCT DESCRIPTION

With its 79.9cc engine the PB-8010 generates wind speeds of over 340Km/h (211mph) at a force of 44N, making it the most powerful blower on the market. Intended for the biggest professional jobs where the extra power will save you time and effort. The unit is kept light weight and ergonomic by the carbon fiber frame and fan case. The fan intake also circulates air around the operator's back for cooling (this function can be prevented during colder weather). The heavy duty air filter sits atop the unit, protecting the engine from dust and debris in the harshest conditions and is easily accessible without the need for tools. Feel the force of the beast.

Ultimate productivity.

With the world's most powerful blower your productivity will be increased, meaning getting one job done faster and moving onto the next.

The Beast.

The PB-8010 has earned itself the nickname of "The Beast" because it is absolutely bursting with power. Like all ECHO products, it is constructed with professional grade components to the highest standards, for day in, day out commercial use.

Power and comfort.

Features to increase your comfort whilst working include a light weight carbon fiber frame, cruise-control throttle, ventilated backpack pad, anti-vibration system and heavy duty straps.

Powerful

Features one of ECHO's most powerful engines.

Low vibration

Vibration reduced by ECHO anti-vibe technology.

Ease of use

Power on and get to work. Intuitive controls and features make your job a breeze.
