GRILLO-FK700

## PRODUCT DESCRIPTION

The front flail mower allows full visibility of the working area, prevents the cutting area from being pressed and facilitates cutting under low branches and bushes!

The floating cutting attachment ensures a perfect result even on undulating terrain. The pivoting rear axle and tractor-profiled front wheels provide a precise finish over bumps and hollows.

The cutting height is mechanically adjustable from a minimum of 0 cm to a maximum of 10 cm. Adjustment is quick and easy without using spacers.

A smooth and progressive single lever controls forward and reverse speed from 0 to 15 km/h in fast gear and from 0 to 8 km/h in slow gear. The lever offers maximum control and ease of use when driving while cutting as well as during transfers.

The disc parking brake is conveniently activated with a hand lever from the driver's seat.

The compact dimensions, 37 cm turning radius and front cutting attachment make the FK 700 ideal for areas with obstacles or narrow spaces.
