

HUSTLER TRAILED BALE UNROLLER TE205

Trailed double bale feeder. Suitable for feeding out the widest variety of round bales, balage, silage, hay or straw. With a unique chassis design protects the vital components, patented Total Control self-loading system and the toughest chain/floor set up on the market. Designed for medium to large operations feeding out thousands of bales each year, The Trailed Bale Unrollers have covered driveshafts to eliminate wrapping and a stronger rear loading system design that is built extremely tough to go the distance.

PRODUCT DETAILS

Make	Hustler
Model	UNROLLA TE205
Bale Size Round	4' X 4' - 6' X 5'
Bale Size Square	-
Bale Weight	Up to 1000kg
Weight	980kg
Loading	Patented Total Control Self loading system
Capacity	2 x bales (round)
SKU	HUSTLER-UN-TE205

PRODUCT DESCRIPTION

KEY BENEFITS

Easy to use

The double bale feeder has single level feed control, making it very easy to use and ideal for share milkers

Toughest chains on the market

Super strong roller chains with the combined strength of 24,000lbs, with tough 40mm x 40mm zinc-plated bars. Bars are bolted to the chain, a stronger and more easily replaceable system

Tough polyethylene floor

Non-corrosive, impervious to UV, slippery, easily repairable and very shock resistant, Fully enclosed - no wastage of expensive feed, The long bed can take 5' long bales

Low maintenance

Instead of bushes we use longer lasting block bearings, mounted outboard, to keep them clean and free of damage

Chassis design

Our fully enclosed chassis prevents rust by stopping water from getting in. We've built the Unroller Trailed Round Bale Feeder with plenty of ground clearance to minimise bellying out and to avoid damage to chains and feed bars when it does touch the ground, we've made the underside of the chassis smooth, so it slides until the wheels gain traction again. Impressive strength to weight ratio has been achieved by constructing the Unroller Trailed Round Bale Feeder from high tensile steel, which is 50% stronger than mild steel. Bolted construction eliminates stress cracking common with some conventional Bale Feeders

Hustler's Unique Total Control Loading

The (TCL2) system that has revolutionized bale handling since it was introduced eight years ago, With just one hydraulic cylinder to complete the entire loading operation and a new gas strut to help reset the loader, the TCL2 is the fastest loading system out there. With only one ram it's safer and less demanding on your tractor's hydraulics. Unlike other systems, the operator can reverse the bale if necessary, even once the bale is positioned low over the cradle for unwrapping.
