

JBI GM40 HEAVY DUTY LINKAGE OFFSET DISC PLOUGH

Heavy Duty linkage offset disc plough designed for hard conditions where the versatility of a linkage set is required. Ideal for firebreaks, row cropping, horticulture etc.

The GM40 offset disc cultivating plough is designed for Australian conditions and is one of the strongest three point linkage disc ploughs available. It is an ideal disc for both primary and secondary tillage on 45 H.P. to 90 H.P. tractors. The gang bolt axles are made from 28mm square high tensile steel and all bearings are triple sealed with added protection plate. Fitted with 560mm x 5mm (22" x 3/16") or 610mm x 5mm (24" x 3/16") scalloped discs. Twin pressure screws can be adjusted individually to transfer weight to the rear of the cultivator resulting in even disc penetration. Easy gang adjustment provides a perfect level finish. Prong type scrapers are optional.
