

JBI LOW BODY MULCHER

The Cyclomatic Low Body Mulcher is available in four models, the Cyclomatic 1500, 1800, 2100 and 2400. They are all fitted with adjustable rear rollers as standard equipment. Optional extras include adjustable skids, wheel kits and the choice of centre line or offset linkage mounting (except the Cyclomatic 1500 which is available in offset only) The wheel kit consists of two solid rubber wheels which swivel 180 degrees. All linkage mounts are adjustable, so an offset can be moved towards the centre and a centre mount offset slightly if required. The Cyclomatic 1500 is offset 6" from centre as standard so can be adjusted to centre if required. Hydraulic sideshift is also available on these models. All Berends mulchers are fitted with stone guards and Y-blades as standard. Tee blades and L blades (high body only) are available for specific uses and are easily interchangeable.
