

JBI MEDIUM DUTY LINKAGE OFFSET DISC PLOUGH

Offset discs are a popular primary cultivation tool with good reason. Discs can cut up and mix in trash, are very hard wearing, long lasting and easy to use. They will chop up matted pasture where a chisel plough will have difficulty breaking down the matted turf once it is floating around the surface. Berends discs are fitted with very high quality discs manufactured by one of the worlds leading disc manufacturers. They have a 28mm (1 1/8") gang bolt axle and all bearings are triple lip sealed and are encased in a protective flange mounting.
