

JBI RM40 HEAVY DUTY TRAILING OFFSET DISC PLOUGH

The RM 40 offset disc cultivating plough is a tough, rugged machine designed for Australian conditions. It is an ideal disc for both primary and secondary tillage on 40 H.P. to 90 H.P. tractors. The gang bolt axles are made from 28mm square high tensile steel and all bearings are greaseable. Fitted with 560mm x 5mm (22" x 3/16") scalloped discs. Twin pressure screws can be adjusted individually to transfer weight to the rear of the cultivator resulting in even disc penetration. Easy gang adjustment provides a perfect level finish. Fully adjustable drawbar and pronged scrapers are standard on the RM40 with options of formed scrapers and parking jack available. Hydraulic lift for the wheels is standard.
