

JBI RM75 HEAVY DUTY TRAILING OFFSET DISC PLOUGH

The RM 75 offset disc cultivating plough is a tough, rugged machine designed for Australian conditions. It is an ideal disc for both primary and secondary tillage on 60 H.P. to 130 H.P. tractors. The gang bolt axles are made from 40mm square high tensile steel and all bearings are triple sealed with added protection plate. Fitted with 610mm x 5mm (24" x 3/16") or 610mm x 6mm (24" x 1/4") scalloped discs. Twin pressure screws can be adjusted individually to transfer weight to the rear of the cultivator resulting in even disc penetration. Easy gang adjustment provides a perfect level finish. Fully adjustable drawbar and pronged scrapers are standard on the RM75 with options of formed scrapers, parking jack and hydraulics for machine lift available.
