

JBI RM80 HEAVY DUTY TRAILING OFFSET DISC PLOUGH

The RM 80 offset disc cultivating plough is designed for extremely tough Australian conditions. It is similar to the RM75 with the main difference being in the greater number of bearings and shorter axles in the disc gang assemblies. It is an ideal disc for both primary and secondary tillage on 75 H.P. to 165 H.P. tractors. The gang bolt axles are made from 40mm square high tensile steel and all bearings are greaseable. Fitted with 610mm x 5mm (24" x 3/16"), 610mm x 6mm (24" x 1/4") or 660 x 6mm (26" x 1/4") scalloped discs. Single pressure screw can be adjusted to transfer weight to the rear of the cultivator, resulting in even disc penetration. Easy gang adjustment provides a perfect level finish. Hydraulic ram and hoses for wheel lift are standard. Fully adjustable drawbar and pronged scrapers are standard on the RM80 with options of formed scrapers for heavy soils.

PRODUCT DETAILS

Make	John Berends Implements
Model	0870, 0871, 0872, 0873
Size	20, 24, 28, 32 plate
Weight	1700kg, 1970kg, 2190kg, 2510kg
No. Bearings	12, 16, 8
No. Axles	4, 6, 8
