

JBI ROTARY DRAIN DIGGER

The Berends rotary drain digger is of heavy duty construction and is fitted with a heavy duty p.t.o. and slip clutch as standard. The digger blades are made of 10mm very high tensile steel and are all set at the best angle possible for drain digging. The machine is fitted with an adjustable foot which can be controlled from the tractor. The foot has a skid on it which ensures an even depth is maintained. An adjustable windrow shield is fitted as standard. The Berends rotary drain digger is capable of digging depths of 24" and a width of 28". Rippers are available as an option and these help especially where the ground is hard and the tractor has good draft ability as well as p.t.o. power.

PRODUCT DETAILS

Make	John Berends Implements
Model	0145, 0146
Weight	210kg
Tractor HP	50-80hp
Cutting Width	711mm
Cutting Depth	610mm
Tractor CAT Connection	2, cat 1
SKU	JBI-25
