

## JBI S-TINE CULTIVATOR HYDRAULIC FOLDING MODEL

The "S" Tine cultivators are most commonly used for secondary cultivation, although they can be used for primary cultivation in lighter soils. The factors which determine which cultivator one should purchase are the conditions of the soil, the horsepower of the tractor and, most importantly, what ones objectives are. For example, are we turning the soil over to plant a crop or do we just wish to aerate an old pasture. All cultivators have the option of a wheel kit for depth control, and in the case of the "S" Tine cultivator, a crumbler is also available for controlling depth and levelling out clumps and clods. All machines have reversible points and all spare parts are available from the manufacturer. 5.4m overall working width folds up to 3.5m transport width. Other sizes can be made to order.

### PRODUCT DETAILS

<b>Make</b>	John Berends Implements
<b>Model</b>	0319
<b>No. Tines</b>	54
<b>Tine Size</b>	32 x 10mm
<b>Overall Width</b>	5500mm
<b>Frame Size</b>	50 x 12mm flat
<b>SKU</b>	JBI-62
