

JBI SINGLE TINE RIPPER/PIPELAYER

There are three different single tine rippers available. The compact ripper is 25mm thick and has been designed to fit small compact tractors. It is able to accommodate the smaller 'red' pipelayer. The standard single tine ripper is 32mm thick and the heavy duty single tine ripper is 50mm thick. Both these models can be fitted with a pipelayer which can take a 2" poly pipe. All models have reversible points and can be upgraded to heavy duty points if necessary. The tines are adjustable and are fitted with shearbolt protection. The tines are fitted with hardened teeth, similar to those fitted to the buckets of industrial loaders.
