PRODUCT DESCRIPTION

Standard Features:

- HST Transmission
- Twin Pedal
- Power Steering
- Hydraulic Remotes (STD)
- Flat Working Platform
- Fold Down ROPS Frame

Engine & Transmission

Eco-Friendly Daedong diesel engine is not only fuel efficient, it also produces minimal noise, little vibration and meets or exceeds EPA regulations

HST models feature performance proven, heavy duty HST drives that deliver power and efficiency. The three range transmission, high, mid, low, and along with a twin pedal operation makes your job easier, smoother and safer.

Operators Station

The illuminated dashboard ensures great visibility while working in bright daylight or at night. Dual HST pedals and joystick are conveniently located for optimum operator comfort. Front-end loader work is also made easier by the use of a single lever joystick. The lever returns to neutral when released and a float position allows the bucket free flotation over the ground surface.
