- 4WD
- HST Transmission or 12x12 Transmission
- Twin Pedal (HST version)
- High Ground Clearance
- Power Steering
- Hydraulic Remotes (STD)

Engine & Transmission

Innovative eco-friendly Daedong engine technology for high fuel efficiency and being environmentally friendly with its low levels of smoke, noise and vibration.

HST models feature performance proven, heavy duty HST drives that deliver power and efficiency. The three range transmission, high, mid, low, and along with a twin pedal operation makes your job easier, smoother and safer.

HST models employ a two pedal system for forward and reverse with smooth engagement, acceleration and deceleration. Pedal pressure is minimized which reduces operator fatigue during long hours of use and when doing repetitive tasks.

Manual transmission models feature 12 Forward and 12 Reverse speeds delivering heavy duty performance. Second and Reverse gears are synchronised for efficient forward and reverse operations requiring frequent shifting.

Operators Station

The standard power steering minimizes the effort required to make tight, repetitive turns. A single lever joystick and dual HST pedals are conveniently located for optimum operator comfort.
