

KIOTI PX1153 CAB FARM TRACTOR

The new Kioti PX1153 tractor has evolved from the PX1052, and is now geared up for more serious work than ever before. Still with the ever dependable 4.4L Perkins engine, the PX1153 received a full raft of upgrades to make it Kioti's most powerful tractor.

Boasting a 115Hp engine, bigger hydraulic pumps, bigger radial tyres, delux air seat and electronic rear linkage with greater lifting capacity are just some of the features.

PRODUCT DETAILS

Make	Kioti
Model	PX1153
Drive System	4WD
Transmission	32 x 32 Power Shuttle
Fuel Capacity	120L
Weight	3702kg
Loader	Standard
SKU	KI-PX1153P-4C

Standard Features:

- 115HP
- Rugged and Dependable
- New Style Bonnet
- 74.8 lpm Oil Flow at Remotes
- Linkage Control on Fenders
- Deluxe Air Seat
- Electronic Linkage Control
- 3,630 kg Lift Capacity

Turbocharged, Intercooled Engine

The turbocharged Perkins Engine with Air-to-Air Intercooler ensures the PX1153 has the power the operator requires. A dual air cleaner offers increased filtration which extends the filter life.

Large Fuel Tank

A large 120litre fuel tank increases production work time without the need for frequent re-fueling.

Main Gear Shift Lever

By using the hand clutch on the PX Series, the main gear lever can be shifted without using the clutch pedal. The operator can select the "hi" or "low" speed of any gear by simply pressing a button on the lever.

Power Shuttle

The Power shuttle lever enables easy back-and-forth operation, reducing operator fatigue. The power shuttle provides softer shuttle operation and allows the operator to perform loader work without pressing the clutch pedal.

Ergonomic Design

The ergonomic layout and color coding of the levers allows for easy operation.

Electronic Linkage Control(ELC)

The ELC on the armrest provides accurate and straightforward control of the rear linkage.

Adjustable Steering Wheel and Instrument Panel

A tilting instrument panel and steering wheel allow the perfect fit for each operator.

3 Point Hitch External Control

The standard external fender control for lifting and lowering of the rear linkage increases the operator's convenience when attaching implements.
