

MURRAY AG LEVELLING HARROW - CHAIN - SERIES 09

A multi-purpose solution. A 'Reduced Tillage' implement suitable to be used for spreading organic matter and levelling seedbeds. Three different depths of chain mesh are available each providing a different level of aggression and pulverisation to suit your requirements.

PRODUCT DETAILS

Make	Murray Agricultural Equipment
Model	Chain - Series 09
SKU	MAE-LCH-09

PRODUCT DESCRIPTION

The Series 09 Chain Harrow is a multipurpose tool and an important element in Pasture maintenance. Versatile in its own right as a means of spreading organic matter and levelling seedbeds, Murray Chain Harrows are beneficial in strip grazed pasture situations and a useful adjunct to efficient harvesting of clover seed by vacuum harvesters. Ideal in direct drilling operations, Murray Chain Harrows are effective in spreading and gently levelling the soil after the important final operation of seeding.

Three depths of chain sections are available - 0.76m (2'6"), 1.5m (5') and 2.28m (7'6"), with each providing a different level of aggression and pulverisation to suit individual requirements. Chain sections are available in 6 convenient widths between 1.52m (5') and 6.09m (20').

Specifications

- Available in 3 depths 0.76m (2'6"), 1.5m (5') and 2.28m (7'6")
- High Carbon 10mm Square Steel
