Available with mechanical 8x8 (T4.55S and T4.65S) or 12x12 transmissions (T4.75S), a T4S offers the specification choice to suit farmyard, or field, hobby farm or hay and forage enterprises. Need a loader? Loader work is a breeze with a hydro-mechanical shuttle standard for clutch free changes between forward and reverse. A quality quick-hitch, quick release loader is standard with impressive cycle times. Do you work with rear mounted equipment? With a T4S you can benefit from class leading performance with Lift-O-Matic linkage control as standard. Servo assisted PTO engagement, with an easy to modulate soft start, comes as part of a tractor that is built to meet modern demands for efficiency and ease of operation with traditional simplicity and ease of maintenance.

EASE OF OWNERSHIP

T4S tractors are designed for hard work. All daily maintenance checks are quick and easy to make which means you'll spend more time doing what a T4S does best: working. Want more? How about fuel efficient, turbo intercooled engines compliant to Tier III emissions standards. An easy to maintain 'powercore' air filter takes care of the extra dust thrown up by loader work - an often overlooked consideration.

ABSOLUTE DRIVING PLEASURE

The new generation four-post cab with a high comfort suspended seat, puts the operator in comfortable control. T4S cab tractors set new standards in this tractor class, with panoramic visibility of all implements. Powerful heating and air conditioning keeps you comfortable in all seasons.

VERSATILITY

Compact and capable, with the hydraulic power shuttle transmission to suit loader and maneuverability needs, a T4S can be your one tractor solution. It is equally at home performing loader work in the yard to working a wide range of attachments in the paddock, park or taming a bush block. The T4S delivers versatility as standard.

POWER AND PRODUCTIVITY

The smooth running S8000 series engine packs an efficient and reliable power punch of up to 75hp with outstanding fuel economy and impressive torque characteristics. Offering the ideal balance between power, weight and size, a T4S is designed to offer dependable performance across a wide range of tasks. It is the power and productivity choice for small farms and dairy units, with a specification to suit applications as diverse as municipal works to estate and contract operations.
