They are equipped with a 400 mm diameter roller with polypropylene spatula.

It is ideal to put aside fresh snow and to clean up sideways, roads, cycle paths, avenues and parking lots.

The gear transmission is in oil-bath.

A lever is comfortably operated from the driver's position to quickly incline the brush up to 25° towards right or left.

The brush is also equipped with height-adjustable, pivoting support wheels to suit any working condition.

Grillo brushes do not damage nor scratch the areas where they are used thanks to their highly-resistant and flexible spatula.
