

PELENC C35 & C45 PRUNING SHEARS

The fastest, most powerful, and safest electric pruning shears for vineyard work.

PRODUCT DETAILS

Make	Pellenc
Model	C35, C45
SKU	PEL-C35-C45

PRODUCT DESCRIPTION

This latest generation of pruning shears is a convergence of cutting-edge technologies, making vineyard pruning faster and more efficient than ever before. Powerful and light, they can easily be adapted to the diameter and hardness of the wood thanks to the options of a 35 mm (model C35) or 45 mm (model C45) diameter cutting head. Safety as a priority: the new PELLENC-patented Activ'Security safety feature stops the blade instantly if it comes into contact with the user's hand, whether they are wearing a PELLENC glove or not. Connected to the ULiB 150, 150P, or 250 battery, these pruning shears will keep going for at least one full day of work in the vineyard.

MAXIMUM PRODUCTIVITY

- The cutting head slices through branches effortlessly
- Two cutting diameters to choose from: 35 or 45 mm
- The latest-generation brushless geared motor
- Four user operating modes

SAFETY AT THE HIGHEST LEVEL

- The user is protected by the patented Activ'Security safety feature, with or without PELLENC gloves
- The ULiB 150, 150 P, and 250 batteries are waterproof (IP54 protection rating), so they can be used rain or shine.

BUILT TO LAST

- The body, ball screws, and nuts are all made from high-strength materials
- The frequency of routine maintenance servicing has been stretched out to once every 400 hours of use
- Guaranteed battery life of more than 1 day

COMFORT AT YOUR FINGERTIPS

- Perfectly balanced
- The tool weighs just 720 g
- Special C45 extender pole for pruning up to a height of 4 metres

FOUR OPERATING MODES

1. Progressive mode with half-opening: works progressively with the blades set to the half-opening position
2. Progressive mode: works progressively without the half-opening position
3. Fast on/off with half-opening: rapid repeated cutting with the blades set to the half-opening position
4. Fast on/off: rapid repeated cutting without the half-opening position

SAFETY MECHANISM

With the user touching the tool at two points on the trigger and the lower body with one hand, the Activ'Security feature stops the blades instantly if their other hand touches a metal part of the cutting head.

CONTROLLED USING THE OPTICAL TRIGGER

It allows for instinctive management of the opening of the cutting head.
