PRODUCT DESCRIPTION

- DYNAMIX DV
- FOX X2 Live Valve 3" shocks
- RIDE COMMAND technology
- Rockford Fosgate Premium audio
- ProStar Fury 2.0L engine

Revolutionary Power. Total Control.

Built for the most demanding drivers, RZR PRO R leads the industry in every way performance is measured. It puts you in charge of the biggest factory engine ever dropped into a side-by-side and gives you the confidence and control to make the most of it.

Power

The industry's first 2.0L engine is a naturally-aspirated beast that delivers an astounding 225 horses of ultra-responsive power.

Strength

With a welded one-piece cage, solid box chassis, stronger driveline and the biggest belt we've ever made, RZR Pro R is made for the toughest terrain.

Control

From the innovative geometry up front to the massive 73.7 cm of usable travel in back, the all-new MaxLink suspension puts you in total control.

The All-New Fury 2.0 Engine

As the saying goes "there's no replacement for displacement." The industry's first two liter delivers desert dominating performance that's cooler running, better balanced and more reliable.

Selectable Drive Modes

This is an engine that does what you tell it. Throttle response is instantaneous and pedal mapping is up to you with selectable drive modes for sport cruising, rock crawling and flat out flying.

More Accessory Power

Accessories are power hungry. RZR Pro R makes it easy to feed them. There's a 1,700 watt, belt-driven alternator, auxiliary battery and 6-position bus bar for plug and play convenience.

MaxLink Suspension

The first factory suspension with a fully boxed design, MaxLink uses strategically reinforced, stamped steel construction to create the strongest side-by-side suspension ever made.

Our Strongest Chassis & Cage

An all-new chassis delivers a 2x increase in torsional stiffness. The welded one-piece cage is built from 2" tubing and uses tapered joints for added strength where it joins the chassis.

A Desert-Born CVT

RZR Pro R's CVT is built to endure the toughest environments. It uses a wider, longer belt, bigger clutches and better airflow to deliver the longest belt life ever seen on a RZR.

All-New DynamiX DV

The industry's most sophisticated suspension controller independently adjusts compression and rebound to keep PRO R glued to the ground on even the most extreme terrain.

Revolutionary Ride and Handling Modes

Selectable ride and handling modes allow you to tune performance on the fly, instantly optimizing shock damping and steering feel for whatever the desert puts in your path.

ULTRA-STABLE STANCE

Pro R's industry-leading 74" stance and 265 cm wheelbase create a rock solid platform that let's you take full advantage of the 40.6 cm ground clearance and 73.7 cm of usable travel.
