

SILVAN RADAK CONVEYOR

The patented air volute design maximises the use of the airflow generated by the 1000mm fan, the Radak ensures thorough coverage of the targeted canopy by directing airflow into the foliage from underneath via the bottom wings. The venturi effect opens up the tree canopy to aid spray penetration and coverage. Ideal for tall tree crops throughout Australia such as macadamias, avocados, mangoes, olives, citrus and lychees (up to 10m).

PRODUCT DETAILS

Make	Silvan
Model	D99-135
SKU	SILVAN-D99-135
