PRODUCT DESCRIPTION

Agility

This tractor has impressive agility in tight corners, with just a 4.5 m turning radius – even with a front loader and front linkage. You can enhance the agility further with Valtra's adjustable QuickSteer.

Comfort

Valtra cabin and front axle suspension offer you more comfort than any other brand.

The unique convex shape of the cab gives you more space where you need it: at shoulder and elbow height. The windows provide almost 7 m² of visibility. The cab is narrow in the front to give space for the exhaust pipe and the high air intake. It's built for reverse driving with TwinTrac, with a 180° swivelling seat and plenty of legroom in the rear.

As always with a Valtra tractor, the N Series cab is a quiet workplace. Thanks to the solid, well-fitting doors (one or two), excellent insulation, and fewer holes for piping, the noise level in the cab is approximately 70 dB. Even in rugged working conditions, there is no extra noise inside the cab.

Not to mention, there's a coolbox to keep your lunch fresh.

Power

The new N Series is the most powerful 4-cylinder tractor in the industry, with a power boost providing up to 201 hp and 800 Nm torque. With up to 200 l/min hydraulics, you have enough power for your implements, up to 78 kN lift capacity in the rear, and an 890 mm lifting range. With its optimal wheel base and the perfect 40%-60% weight distribution you get a good grip on the ground and good balance for front loader work.

Visibility

The Valtra cab gives you the best visibility in all directions with the Valtra 365 Day visibility concept: day or night, summer or winter, in reverse driving or doing front loader work. The Skyview cab option gives you the ultimate visibility for reverse driving and the roof window provides great visibility for front loader work. The narrow pillars and exhaust pipe enable you to see more. The 270° windshield wiper keeps the heated front windscreen clear in any weather. Premium LED working lights provide visibility in all directions. With black panel mode you can dim the interior lighting to maximise visibility outside. A safety camera gives you a clear view of the hitch or implement.
