

VALTRA T234 TRACTOR

Valtra T Series is built for working in tough conditions, every day. The T Series provides power for pulling a plough and agility for moving hay bales. It gives excellent visibility for precision work and versatility with PTO for power-hungry implements. All this combined with low total cost of ownership, makes this the perfect working machine for you. The T Series is built for working in tough conditions - every day.

PRODUCT DETAILS

Make	Valtra
Model	T234
Drive System	4WD
Horsepower	250hp
Transmission	5 speed powershift with HiTech, Active, Direct, Versu
Fuel Capacity	380L
Weight	7300kg
Loader	Standard
SKU	VALTRA-T234

PRODUCT DESCRIPTION

Ease of use

We made owning, operating and servicing your tractor easy so that you can concentrate on your work. The controls in the cab are located to minimise body movement, transmission operation is easy with a new drive lever, and the bright work lights let you keep working when night falls. We paid extra attention to the daily maintenance points, so that checking the oil and cleaning the filters take as little time as possible. The T Series is well suited for your work because many of its unique features were actually innovated by our customers.

The cab is your comfort zone

You notice the comfort as soon as you enter the cab – three steps and safe access through the wide-opening and softclosing door. You have fingertip control of the new 5-speed powershift or Direct CVT, with a drive lever for driving and a joystick for controlling all tractor hydraulics. The cab has four seat options, from mechanical suspension to the Valtra Evolution seat with air conditioning and air suspension. Your co-driver also enjoys comfort and plenty of space. Two cab suspensions are available: luxury, semi-active pneumatic AutoComfort and a new mechanical suspension. The T Series has a front axle with AIREs+ suspension that constantly monitors the ground and communicates with the AutoComfort cab suspension to make you feel as comfortable as possible.

Intelligent frame

With its long wheelbase, 2995 mm, the T Series gives good stability and a steady ride. This tractor also reaches a new level of agility, with a turning radius of just 5.25 m, thanks to the narrow engine construction, integrated front linkage and front PTO. At the same time, the frame structure enables us to design the bonnet in a way that improves visibility. While the T Series has a high ground clearance up to 60 cm, the cab sits lower, making this the most compact 6-cylinder on the market, and it still handles high payloads.

Heavy lifting

The T Series is excellent for maximum grip thanks to its front/rear weight distribution of 40%/60%. The front loader sub-frame is fully integrated with the frame structure. The integrated front lift gives you the highest lifting capacity on the market, 51 kN in front and up to 95 kN in the rear. The unique 890 mm lift height makes it easy to work with implements. Both a three-speed, electrically controlled PTO and a Ground Speed
