

## VICON FANEX 554 TEDDER

The Fanex 554 is designed to perform perfectly in all crop conditions, with a minimum of non-productive maintenance required and with diminished transport dimensions.

Featuring a heavy duty fully closed headstock this machine will fit perfectly into the operation of professional farmers, looking for a strong, effective, and versatile tedder.

These tedders are fitted with a high performance driveline combination. The complete driveline is maintenance-free, and offers highly reliable transfer of power, combined with extremely compact transport dimensions thanks to a winning combination of u-joints and finger clutch joints (Fanex 764, 904).
