

VICON RO-XL1875 TWIN DISC SPREADER

The RO-XL is the high capacity model of the RotaFlow range. The heavy duty construction of the RO-XL makes it possible to carry up a maximum of 3.450 or 3.900 litres of fertiliser with 3 extension rims. Easy setting and adjustment can be done with the FlowPilot on each spreading disc. An innovative drive line to each disc ensures gentle agitation due to the “slow rotating” agitator system, which runs at 15% of the spreading disc speed. Both discs can be shut off independently to spread half the working width, essential for preventing lodging in tapering headlands.

PRODUCT DETAILS

Make	Vicon
Model	RO-XL1875
Hopper Capacity	1875L
Width	2900mm
Weight	530kg
Spread Width	12-54m
SKU	VICON-ROXL1875
